RAIL ATTACHMENTS

Boss Attachments is proud to become the New Zealand distributor for the Harrybilt Engineering range of rail maintenance equipment.

Like our company, Harrybilt Engineering has built its stellar reputation through an unrelenting focus on innovation, product quality and added value performance. Both companies are also family owned and we believe that these important shared values, as well as our close Trans-Tasman links, will help us deliver a number of important localized benefits for our New Zealand clients.

Harrybilt Engineering is based at Ballarat in Australia and has over 35 years experience in the rail sector. This has seen the company grow to become their country's leading supplier of road rail trucks, excavators, trailers, rail maintenance attachments and work tools.

Their unique level of experience also means that Harrybilt Engineering is able to supply clients with customised design and build solutions for even the most complex rail infrastructure challenges.

Boss Attachments has already been involved in a number of successful NZ rail projects, including the Auckland CRL, Kaiikora Rebuild and the North Auckland Railway line rebuild, so this exciting new association will allow us to further expand our credentials within the rail sector.

OUR ATTACHMENTS

RAIL THREADER

An efficient method of handling rail, a grab for the rail head and rollers providing rail lift on and off sleepers.

CENTIPEDE

Used to undercut, remove ballast from under rail sleeper efficiently.

TAMPER

A range of tampers used to efficiently compact ballast under railway sleepers on rail networks. Sizes to suit 5t - 17t Excavators.

RAIL TRAILER

Range includes Flat Deck, Sleeper Deck, Skeleton and Light Weight Trailers in a range of sizes and optional extras to suit every rail application.

RAIL SCRUBBER

Cleans the rail head of rust and grime on old rail allowing for efficient metal to metal contact and improves rail detection.

STINGRAY BALLAST SWEEPER

Removes excess ballast from rail line and around sleeper slips.

LIGHT WEIGHT/SMALL ATTACHMENTS

LIGHT WEIGHT RAIL GRAB

SHORT BLADE UNDERCUTTER

MINI BULLANT

LIGHT WEIGHT TAMPER

Any of our products can be customised to suit smaller excavators.

PLATYPUS - STANDARD

PLATYPUS - CLIP PUSHER

PLATYPUS - WIDE BLADE

Have been designed to simplify and speed up the safe replacement of railway sleepers. The grab picks up and side inserts concrete sleepers under the rail line. This product allows for a fast and efficient method and saves manual handling, time and money.

OCTOPUS 4

OCTOPUS 6

OCTOPUS 8

To simplify and speed up the safe laying of concrete sleepers for rail and tram networks. The Octopus 4 is suited for a min 12 ton excavator, the Octopus 6 is suited for a min 16 ton excavator and the Octopus 8 is suited for a min 30 ton excavator.

MINI PLATYPUS

This attachment is a game changer for handling concrete sleepers with small 5t-8t machines.

FORK GRAB

Safe and efficient handling of pallets and packs of sleepers, with the option of picking up and positioning single and rejected sleepers.

BULLANT

Multi-purpose grab used to lift and manoeuvre a range of objects including steel or timber rail sleepers.

RAIL GRAB

This 6m dual jaw grab picks up and manoeuvres lengths of rail up to 2000kg in weight. A hydraulic extendable rail grab is also available.

SLEEPER GRAB

An efficient method for unloading and moving sleeper stock up to 12 sleepers from a standard pack.

POINTS BEARER GRAB

This grab has been designed to pick up points bearers up to 6 meters in length.

RAIL DRAG BLOCK

Designed to fit over the head of the rail, and is a means of dragging or pulling lengths of rail.

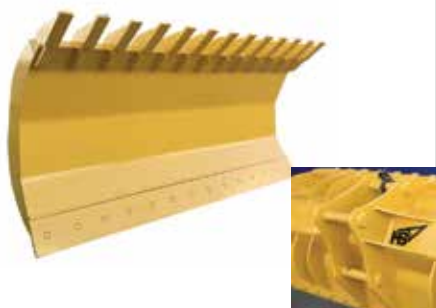

RAIL SCISSORS

Designed to clamp directly over the head of the rail, and is a means of lifting lengths of rail.

RAIL DOG

The rail dog is used as a rail mounted fall arrest device, certified to Australian Standards for Industrial Arrest Systems and Devices.

RAKE / BLADE

Has a twin position hitch so that the operator is able to pick up the attachment for raking or cleaning up with the blade edge.

4 in 1 BUCKET

Suited to fit an excavator, can support any Rail Maintenance activities or General Civil work.

CRIBBING BUCKET

Allowing operators to efficiently clean under rails. Trench Buckets and Mud Buckets are also available as well as Special Purpose Buckets.

ADJUSTABLE FORK GRAB

The adjustable fork tynes allow the attachment to grab multiple sizes and weights of work tools and general rail maintenance gear.

LIGHTWEIGHT FORK

Suitable for 5-8t Excavators, this attachment allows the safe and efficient handling of work tools and general rail maintenance gear.

YABBY GRAB

A grab designed as a multipurpose tool for excavator use.
